Government Degree College D.H. Pora-192233

Environmental & Energy Policy Document, GDC DH Para

The Environment and Energy usage Policy of Government Degree College D.H. Para is to manage environment and energy in a systematic manner with an aim to minimize the carbon footprints on the environment. The policy advocates exploring the options of renewable energy resources to reduce the environmental and financial burden both on government and on the institution. This policy is a binding document for all the stakeholders of the institution for the different activities that are being undertaken here. In fact, it is a protocol for the institutional sustainable development, to help us to use the energy and environmental resources more wisely and judiciously. It is further expected that the policy shall work for the inculcation of environmental ethics among the students and faculty, thus helping us to realize our responsibilities and put forward our commitments for the conservation of natural resources and minimization of ecological footprints. The Environment Audit Committee is an official group of our college devoted to the cause of environmental awareness, to undertake green initiatives, and to conduct green audit surveys, in order to monitor the anthropogenic pressure on the campus environment. The policy outcome comes in the form of an annual environmental audit report which focuses on:

- Analysis of the Spatio-temporal change taking place in the campus land use pattern.
- Conversion of the campus vacant land into green land in order to increase the aesthetic look of the campus and to reduce the environmental pollution.
- Reduction of our non-renewable energy usage.
- Analysis of the quantum of daily waste generation, segregation and disposal.
- Analysis of water quality, storage and distribution in the campus.
- Installation and monitoring of photovoltaic solar panels for the generation of eco-friendly energy.
- Installation of LED bulbs in all the building to save energy consumption.
- Development of systematic waste management mechanism.
- Undertaking annual tree plantation drives.
- Curtailing the consumption Coal and LPG.
- Training students and staff as the real stewards of environment.
